The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).								
Status								
1) Respons	ive to communication(s) filed on 2	<u>26 July 2005</u> .			•			
2a) ☐ This action	☐ This action is FINAL . 2b) ☑ This action is non-final.							
3) ☐ Since this	s application is in condition for all	owance except	for formal matters, pro	secution as to the	merits is			
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.								
Disposition of Cla	ims							
4)⊠ Claim(s)	1-8,10 and 12-21 is/are pending i	n the application	on.		••			
4a) Of the above claim(s) is/are withdrawn from consideration.

DETAILED ACTION

Page 2

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/20/05 has been entered.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Application/Control Number: 10/037,829

Art Unit: 2613

4. Claims 1-8, 10, and 12-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Salvio et al (5,619,036) in view of Strumolo et al (6,535,242).

Salvio et al, in Figures 1 and 2, discloses a low cost night vision camera for vehicles and mounting thereof that is substantially the same vision enhancement system for use on a vehicle as specified in claims 1-8, 10, and 12-21 of the present invention, the vehicle 1010 having an exterior body portion 1011, comprising a camera 14 mounted to the vehicle 1010 behind the exterior body portion 1011; a door 42 moveably mounted in the body portion 1011, the door 42 positioned in the camera's line of sight and capable of being moved between a closed position and an open position; and an actuator 44 for selectively positioning the door in one of the open and closed positions; and a controller 10 coupled to the camera 14 and to the actuator for opening the door 42 and activating the camera 14.

With respect to claims 2-8, 10, and 12-21, Figure 1 of Salvio et al illustrates the same night vision enhancement system mounted on a vehicle; Figure 2 illustrates the detailed mounting structures of the system behind the grill; and Figures 3 and 4 illustrate the control structures of the door assembly.

Although Salvio et al discloses a controller 10 for opening the door and activating the camera, it is noted Salvio et al differs from the present invention in that it fails to particularly disclose such action based on ambient light conditions. Strumolo et al however, in Figure 1, teaches the concept of such well known controller 14 coupled to an exterior ambient light detector 28 for controlling a night vision camera 18 based on exterior ambient light falling below a predetermined threshold.

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made, having both the references of Salvio et al and Strumolo et al before him/her, to exploit the common light detector as taught by Strumolo et al in the night vision enhancement system of Salvio et al, in order to automatically controlling the system to obtain image information when the ambient light level outside of the vehicle is relatively low.

Response to Arguments

5. Applicant's arguments with respect to claims 1-8, 10, and 12-21 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Y. Lee whose telephone number is (571) 272-7334.

The examiner can normally be reached on (571) 272-7334.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mehrdad Dastouri can be reached on (571) 272-7418. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
